

SCOTTIE SCHEFFLER

AND

friends

TEE OFF

ON

CHILDHOOD CANCER

GALA

FRIDAY, OCTOBER 25, 2024

AT The Post Oak Houston, Texas

Scottie and James became close friends playing golf together on the Texas Legends Junior Tour. Even then, Scottie was the same grounded, humble, hard-working, faithful, and family-oriented young man he is today. After James died, while Scottie was still in college, Scottie would take the time each year to be the honorary starter at TOKC's Annual James A. Ragan Triumph Scramble Golf Tournament in Corpus Christi, in honor of his friend.

Scottie, his wife, Meredith, and their family continue to be great friends, supporters, and volunteers of TOKC. Since embarking on his career as a professional golfer, Scottie continues to support TOKC and the work we're doing. Funds he has donated continue to bring joy to kids with cancer. We have had special golf clubs made and started a program called "Scottie's Heroes", where we give golf clubs to young cancer patients. As his schedule allows, Scottie and Meredith, along with TOKC representatives go to children's hospitals and give the clubs to children with cancer. It's no surprise that Scottie and Meredith have partnered with TOKC for a special event on Friday, October 25th. It will be an evening filled with love, celebration and fundraising for kids with cancer.

EVENT CO-CHAIRS

Lily and Johnathan Schnitzer

Shannon and Stuart White

Tonya Pippin and David Bailey

Ann and Mark Woodroof

BOARD OF DIRECTORS

Omar Abou-Sayed

05/07/93 - 2/17/14

Mecklin V. Ragan, M.D.

WINGMAN

Each year TOKC invites a child with cancer to serve as James' Wingman, a living reminder of the importance of the work we do to bring about an end to childhood cancer.

MULLIGANS

TOKC gives children with cancer and their families HOPE for a better future by funding innovative research to advance new and more effective treatments to help children survive, and providing JOY by raising their spirits and driving public awareness to the daily lives of children with cancer.

“And I suppose none of you have looked into the face of a doctor who has cared for you since you were a kid who wants nothing more than to save your life and instead has to tell you that you have no more options and you need to go enjoy the rest of the life you have left. If you could look into the face of that doctor and see that sadness and despair, then you would fund pediatric cancer research and help those doctors.

I want you to remember my face. Because my face is the face of every kid that dies from a pediatric cancer that isn't profitable to cure. My face is the face of every kid that dies because the drugs don't have "a rigorous business plan demonstrating demand and self sustainability.

And everyday you ignore a cancer like pediatric cancer, you cost this country the energy and leadership of thousands of kids just like me with infinite potential to secure the future of our Country.”

James A. Ragan, CPRIT 2012
